

Why Do Patients Prefer AI3

Advanced Imaging and Interventional Institute is the Tampa Bay Area's first and most advanced *FREE-STANDING* center for Interventional Radiology and Vascular Specialties

1. **No Over Night Hospital Stays** – Patients will return to the comfort of their own homes the same day of procedures
2. **Less Costly** - The services that AI3 provides are much less expensive than the same procedures done in a hospital setting and provide a real financial savings. This could make a difference in hundreds of dollars for personal medical expenses from co-pays and deductibles
3. **State-Of-The-Art Equipment** - The interventional suite at AI3 has equipment which is more advanced than most hospitals in the Tampa area and is a national show site for General Electric Corporation
4. **Special Care and Patient Education** - Patients receive extensive education from the medical staff to learn more about themselves and medical conditions
5. **Highly Qualified Physicians** – All of our doctors are board certified Vascular Interventional Radiologists. Dr. Jerry is the present Chairman of the Economics Committee SIR and has been providing a major role in training standards for physicians performing Interventional Radiology
6. **Less likely to become ill from infectious disease** – 5% of all hospital inpatients acquire an infection of some kind during their stay, according to the US Department of Health and Human Services.

AI3 is the first and most advanced **FREE-STANDING** Interventional Radiology and Vascular office in the Tampa Bay area.

Interventional Radiology

Free-Standing Office Based Intervention
Safe, Effective & **LESS COSTLY** for patients

State-Of-The-Art Equipment

*Tampa Bay Area's 1st Choice for
Interventional Procedures
and Diagnostic Imaging*

*MR/MRI * CT/CTA * Ultrasound * Biopsy*

The Premier Center for Interventional Radiology & Diagnostic Imaging

Advanced Imaging and Interventional Institute (AI3) is the first and most advanced **FREE-STANDING** Interventional Radiology office in the Tampa Bay Area.

State-Of-The-Art Equipment: The interventional suite at AI3 has equipment which is more advanced than most hospitals in the Tampa Bay area and is a national show site for General Electric Corporation

- **Peripheral Artery Disease (PAD)** - Angiogram, Angioplasty, Stenting
- **Spinal Compression Fractures** - Kyphoplasty / Vertebroplasty
- **Women's Health** - Uterine Fibroid Embolization, Fallopian Tube Recanalization, Breast Biopsy
- **Innovative Therapy for Cancer** - Chemoembolization, Radiofrequency Ablation, Port Inserts, Biopsy
- **Dialysis Graft Management** - Fistulagram, Angioplasty, Graft Declot, Catheter Insertion, Removal and Exchange
- **Pain Management** - ESI, Hip Injections, SI Joint Injection, Spinal Cord Stimulation, Kyphoplasty
- **Varicose Veins** - Sclerotherapy, Radiofrequency Closure, Endovenous Laser, Phlebectomy

Diagnostic Imaging

- **Magnetic Resonance Imaging (MRI)** Is a noninvasive way for your doctor to examine your organs, tissues and skeletal system. It produces high-resolution images that help diagnose a variety of problems.
- **Computerized Tomography (CT Scan or CT)** combines a series of X-ray views taken from many different angles and computer processing to create cross-sectional images of the bones and soft tissues inside your body.
- **Ultrasound** is a common, noninvasive diagnostic tool that uses high-frequency sound waves to produce dynamic images (sonograms) of organs and tissues inside the body. Unlike CAT scans and X-rays, ultrasound does not use radiation, and therefore is safe during pregnancy.
- **Biopsy** is a sample of tissue taken from the body in order to examine it more closely. A doctor should recommend a biopsy when an initial test suggests an area of tissue in the body isn't normal.

Interventional Radiology Services MRI / CT / Ultrasound / Biopsy

Free-Standing Office Based Intervention is Safe, Effective & **LESS COSTLY** for patients

We know what you need and want...

- **Same day appointments available**
(Insurance permitting)
- **Fast turnaround times for diagnostic reports**
- **Physicians 24/7 access to online reports and images @ www.pacs.ai3web.com**
- **Board Certified and Fellowship Trained Radiologists**
- **We Accept Most Insurance, Auto and Workers Compensation**

Interventional radiology procedures are advances in medicine that often replace open surgical procedures. Using image guidance, our Interventional Radiologists are able to perform these minimally invasive procedures that are generally easier on the patient because they involve no large incisions, less risk, less pain and shorter recovery times.
